

# ST1000 Face Mask 3-ply

Reusable fabric face mask

**The Danish authorities demand that people wear face masks in public in Denmark. There is no requirement for them to be CE approved or medical. [Read our face mask guide click here.](#)**

**We can now offer 3-layer reusable fabric face masks, which can be washed at 60°C**

- Inner layer: Mesh, 100% polyester
- Middle layer: Single jersey, 100% cotton
- Outer layer: Isoli, 65% cotton / 35% polyester
- Coated metal nose clip which is sewn into the mask
- Adjustable straps for the ears (13 cm.)
- Washable at 60°C
- Suitable for printing

- Not for medical use
- Not personal protective equipment
- We recommend that you wash the mask before use

[Read the test report here](#)

We have chosen to use 3 different materials for ST1000 Face Mask, each layer has its own quality.

The inner layer is mesh, which is often used for sportswear as it helps to conduct moisture away from the body, and in this case, away from your face.

In the middle, there is a layer of single jersey that helps to absorb and retain moisture.

The outer layer is a brushed isoli where the inside absorbs moisture and the outside prevents moisture from penetrating.

It has a round shape over the nose and mouth to provide a spacious fit. It shapes around the chin and fits well on both large and small faces.

The edge is finished with mesh piping which is soft against the skin. The piping continues and turns into ear straps.

The ear straps have a soft plastic bead that holds the straps in place.

The nose clip helps to keep the mask in place and close to the nose. This is an advantage especially if you wear glasses, so they do not fog up.
